| 14"         | 48"           |               | 5.50          |

#### Specifications

Carbon-steel body equipped with easily replaceable cups and brushes mounted on wear-compensating springs, providing 360° coverage of internal pipe surface, and articulated spring for tight-radius bend negotiation. Capable of being fitted with gauging plate machined to specifications. 6" through 14" are center-rod type.

#### Applications

Used during pre-commission and on-stream cleaning where rust, millscale, sand, wax, organic growth, mud, oxides, and other foreign matter exist. Equipped with gauging plate, pig is used to prove pipe roundness and to ensure excessive weld penetration or debris does not exist. Also used to prove minimum bend radius prior to intelligent pig use.

#### Options

Carbon steel, stainless steel, or aluminum body; cups manufactured from polyurethane, neoprene, viton, epdm, buna-n or other elastomer compounds for special services; circular or spring-mounted brushes; carbon-steel, stainless steel, prostran brushes or polyurethane blades; aluminum or steel gauging plate of varying thickness, with or without slots; transmitter or pinger cavity; magnets; configurations can be modified to include discs for increased sealing capabilities or substitution of discs for bidirectional use with circular brushes; customized dimensions for special pigging applications.
